

Stay connected. Work anywhere.

Remove the complexity of owning and managing a business phone system with Cloud Unified Communications.

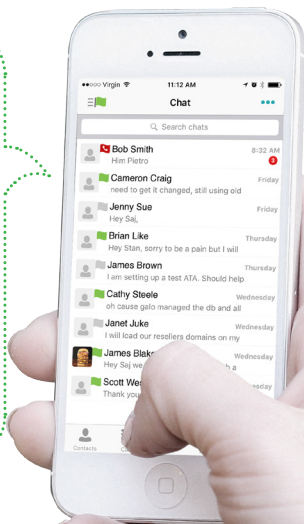

More than a replacement for your PBX, Access4 Unified Communications as a Service is enabling the way you need to work.

Unified Communications as a Service (UCaaS) provides seamless communications regardless of the device or location of the user.

It removes the need for capital investment in technology that ages, instead providing a pay per user per month model that everyone expects from cloud services

Stay ahead of the pack

Cloud Voice Solutions provides the very latest deployment of Broadsoft, and a commitment to always stay current

Cloud is prevailing across your business, why not your PBX?

Lower Costs – No need to buy and manage equipment allowing you to focus on your business

Scalability – Scale and contract as needed to meet your business requirements

Increased Functionality – gain access to functions for users as and when they need it

Greater Reliability – access carrier grade redundancy provided by Access4 without the cost to each user.

Powered by Broadsoft

BroadSoft provides a leading telephony and united communications platform as chosen by carriers worldwide.

Simplified user role profiles

Office User

Entry telephony replacement for office workers

Executive User

Advanced telephony including mobility reach for users on the move

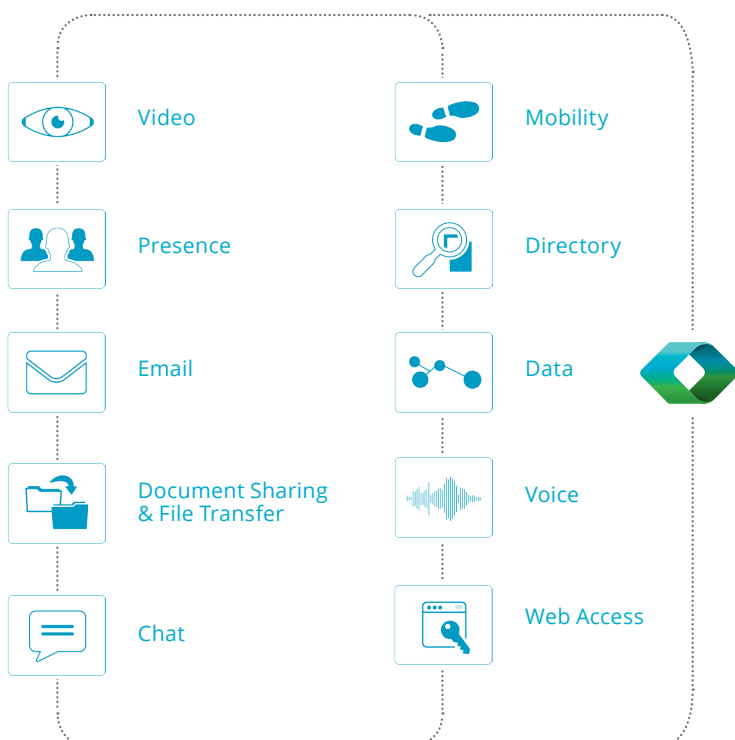

Collaboration User

Unlock the power of collaboration across multiple devices

What is UCaaS?

Through the Power of BroadSoft BroadWorks, Cloud Voice Solutions Unified Communications as a Service (UCaaS) provides the ability to:

- Have a single bricks and mortar number across multiple devices.
- Have access to the corporate phone environment whilst not in the office
- See users' presence and integrate with other systems such as Outlook and CRM
- Send Instant Messages to people inside and outside of the organisation
- Use video on demand, both one on one and group sessions.
- Share documents and workspaces in real time without the need for additional emails and the time delay.
